1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-4 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 18-23 and 27-32 of copending of 724,186. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 18-23 and 27-32 recite applicant's claimed flat panel including outer and inner surfaces satisfying applicant's claimed (1) relation, and (2) transmission ratio.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 2879

- 3. Claims 1-4 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,160,344.

 Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-14 of U.S.

 Patent No. 6,160,344 recite applicant's claimed flat panel including outer and inner surfaces satisfying applicant's claimed (1) relation, and (2) transmission ratio.
- 4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by applicant's admitted prior art

Applicant's admitted prior art (Fig. 3) discloses applicant's claimed flat panel having inner and outer surfaces satisfying applicant's claimed relation of Y1=Y2.

Consequently, admitted prior art anticipates applicant's claims 1 and 3.

Art Unit: 2879

.)

6. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Inoue et al (U.S. Pat. '686, of record).

Inoue et al disclose applicant's claimed flat panel (Figure 1A) having inner and outer surfaces (12) satisfying applicant's claimed relation of Y1 less than or equal to Y2. Inoue et al disclose thickness (Y1) of panel at the center being less or equal to the thickness (Y2) of panel at the peripheral (see bottom portion) of the panel device.

Consequently, Inoue et al anticipate applicant's claims 1 and 3.

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Application/Control Number: 09/918,634
Art Unit: 2879

8. Claims 2 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over admitted prior art or Inoue et al (applied individually).

Although applicant's admitted prior art or Inoue et al do(es) not disclose the high transmission ratio of about greater than 60, providing the transmission in a desired range would have been obvious to one of ordinary skill in the art by simply modifying the Y1 ad Y2 thickness of the flat panel.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Iguchi et al is cited for showing a general structure of a flat panel of a CRT.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ashok Patel whose telephone number is 703-305-4934. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimesh Patel can be reached on 703-305-4794. The fax phone numbers for the organization where this application or proceeding is assigned
